

1ST INTERNATIONAL TRAINING COURSE ON NEUROIMAGING OF EPILEPSY

May 18 - 21, 2017

*Montreal Neurological Institute & McConnell Brain Imaging Centre
McGill University, Montreal, Quebec, Canada*

The course will provide clinicians and scientists working in epilepsy with an understanding of fundamentals and practical skills related to neuroimaging.

The course welcomes both individuals with and those without prior expertise in neuroimaging. In addition to offering methodological insights, emphasis will be placed on clinical decision-making and translation to local settings.

Morning sessions will consist of lectures given by a faculty of world-class neuroimagers and epileptologists. In the afternoon, participants will benefit from hand-on sessions guided by experienced tutors, including image acquisition in the MRI suite, quality control procedures, visual MRI analysis, functional MRI, together with cutting-edge diagnostic techniques.

Andrea Bernasconi, MD
Chair - ILAE Neuroimaging Taskforce
